

# Carbon Assessment.

Prepared for supplier-side emissions reporting, tender responses, customer requests and AASB S2-related supply chain data requests.

**PREPARED FOR****Sample Manufacturing Pty Ltd****REPORTING PERIOD****1 Jul 2025 - 30 Jun 2026****REFERENCE****LC-A-SAMPLE-001**

This is a shortened public-facing sample. Final client reports include client-specific data coverage, assumptions, calculation notes and supporting schedules that are not reproduced in this website preview.

## EXECUTIVE SUMMARY

## Assessed emissions summary

This sample assessment shows how Less Carbon presents a supplier's Scope 1 and Scope 2 emissions position in a clear, standardised format. It is designed to support practical responses to customer, tender, lender and reporting entity requests.

## TOTAL ASSESSED EMISSIONS

**86.4**tCO<sub>2</sub>-e

## SCOPE 1

**31.8**tCO<sub>2</sub>-e

## SCOPE 2

**54.6**tCO<sub>2</sub>-e

## MAIN ASSESSED SOURCES

- Purchased electricity was the largest assessed source.
- Mobile fuel use was the largest Scope 1 contributor.
- No material refrigerant loss was disclosed for this sample period.

## WHAT THIS REPORT IS FOR

This assessment gives a customer or reporting entity a consistent supplier emissions profile for the period stated.

It is not a statutory audit, full assurance engagement, product LCA or Scope 3 inventory unless expressly stated in the final report.

**Website sample note:** The final issued report contains more detail than this preview, including source-by-source assumptions, data coverage and calculation notes. Those working sections are intentionally abbreviated here.

ASSESSMENT SCOPE

Boundary of the assessment

The assessment covers the entity, sites and activity data made available through the Less Carbon intake and document submission process.

| ITEM            | SAMPLE DETAIL                                         |
|-----------------|-------------------------------------------------------|
| Entity assessed | Sample Manufacturing Pty Ltd                          |
| ABN             | 00 000 000 000 (sample)                               |
| Sites included  | 3 operating sites                                     |
| Scope covered   | Scope 1 and Scope 2 emissions only                    |
| Exclusions      | Scope 3 emissions and product-level lifecycle impacts |

BOUNDARY STATEMENT

The final client report identifies the reporting period, operational boundary, included sites, relevant exclusions and any data coverage limitations.

For this public sample, detailed site-by-site and activity-level schedules have been withheld.

TYPICAL DATA SOURCES REVIEWED

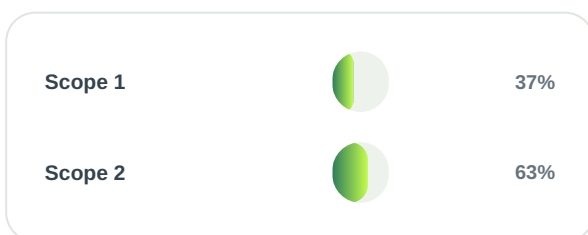

|                                                                                                   |                                                                                               |                                                                                                |                                                                                               |
|---------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------|
| <p><b>Electricity records</b></p> <p>Bills, usage data and NMI-level records where available.</p> | <p><b>Fuel records</b></p> <p>Fuel cards, invoices and fleet-related consumption records.</p> | <p><b>Site register</b></p> <p>Locations, site types and operational boundary information.</p> | <p><b>HVAC records</b></p> <p>Refrigerant service, top-up or loss records where relevant.</p> |

| COVERAGE AREA | STATUS SHOWN IN FINAL REPORT | SAMPLE TREATMENT                        |
|---------------|------------------------------|-----------------------------------------|
| Electricity   | REVIEWED                     | Aggregated only in this preview.        |
| Mobile fuel   | REVIEWED                     | Summarised at category level.           |
| Refrigerants  | CHECKED                      | No detailed service records reproduced. |

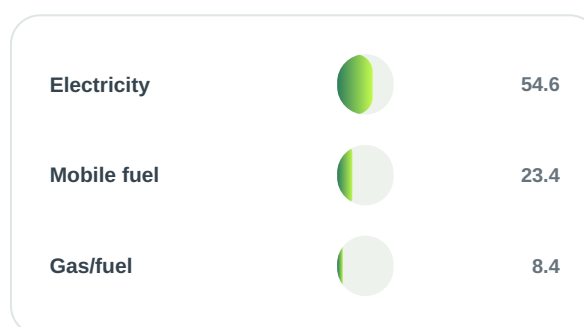

## EMISSIONS SUMMARY

## Summary by scope and source

| EMISSIONS CATEGORY              | TCO2-E      |
|---------------------------------|-------------|
| Scope 1 emissions               | 31.8        |
| Scope 2 emissions               | 54.6        |
| <b>Total assessed emissions</b> | <b>86.4</b> |

| SOURCE CATEGORY            | SAMPLE SHARE |
|----------------------------|--------------|
| Purchased electricity      | 63%          |
| Mobile fuel combustion     | 27%          |
| Stationary fuel combustion | 10%          |
| Fugitive emissions         | 0%           |

The full issued report includes category-level notes explaining how each source was treated, what records were used and whether any activity data was incomplete, excluded or normalised.

### KEY SOURCE OBSERVATIONS

- Purchased electricity represented the largest assessed source for the reporting period.
- Mobile fuel was a material Scope 1 contributor based on submitted fuel records.
- Results apply only to the period and boundary stated in this report.

### HOW CUSTOMERS CAN USE IT

The output is intended to give customers and reporting entities a consistent supplier emissions profile without requiring the supplier to build a full carbon reporting function internally.

METHODOLOGY BASIS

## Clear basis, without exposing the working engine

This assessment has been prepared using client-submitted activity data and supporting records. Greenhouse gas emissions are assessed on a Scope 1 and Scope 2 basis with reference to the GHG Protocol Corporate Standard and applicable Australian emissions factors and guidance relevant to AASB S2-related reporting.

### INCLUDED IN THE FINAL REPORT

- Reporting period, entity and operational boundary.
- Source category emissions summary.
- Data coverage, assumptions and limitations.
- Report reference and related certificate details.

### NOT SHOWN IN THIS PUBLIC SAMPLE

- Detailed calculation records and factor-by-factor workings.
- Client documents, invoices and source files.
- Site-by-site activity schedules.
- Commercial or confidential supplier information.

### IMPORTANT REPORT LIMITATION

This document does not constitute financial audit, statutory assurance or independent verification unless expressly stated otherwise. Results are based on the information and supporting records made available by the client for the reporting period.

Where records are incomplete, unavailable or only partly available, the final report notes the relevant assumption, exclusion or limitation.

### SOURCE TREATMENT OVERVIEW

| SOURCE AREA           | SAMPLE DESCRIPTION                                                                                 |
|-----------------------|----------------------------------------------------------------------------------------------------|
| Stationary fuel       | Assessed where fuel consumption records are provided for included sites and activities.            |
| Mobile fuel           | Assessed using fuel cards, invoices or operational fleet records submitted for the period.         |
| Purchased electricity | Assessed using electricity consumption records for included sites and the stated reporting period. |
| Fugitive emissions    | Assessed where refrigerant servicing, top-up or loss records are available.                        |

## FINAL OUTPUT

## What the client receives

The issued Less Carbon package includes the assessment report and related Supplier Emissions Certificate. The certificate can be checked through the Less Carbon registry using the certificate number or QR code.

## REPORT

**Carbon Assessment for the stated period and boundary**

## CERTIFICATE

**Supplier Emissions Certificate with unique reference**

## REGISTER

**Public verification of certificate status and core details**

## RENEWAL

**12-month certificate cycle and renewal reminder**

## QR / REGISTRY CHECK

This sample QR visual is illustrative only. A final certificate links to a registry status page for verification.

## CERTIFICATE STATUS

**SAMPLE ONLY**

No live certificate, supplier record or registry entry is created by this sample.

**Customer-facing disclosure:** Public registry results are deliberately limited. Further disclosure of supplier information is controlled through the supplier and the relevant engagement terms.

## FINAL REPORT APPENDICES

The full report may include a site register, activity data coverage summary and business profile. These appendices are represented only at a high level in this public sample.
