SUPPLIER PROGRAM

FY2026 Supplier Emissions Data Program

DELIVERY DATE

15 August 2026

STATUS

Public sample version

This public sample is designed to show the format of a Reporting Entity batch delivery pack. It is not an audit, assurance opinion, legal compliance certification or full Scope 3 report.

One batch. One clean handover.

At the end of each supplier batch, Less Carbon provides a structured delivery pack your sustainability, procurement, finance and reporting teams can review, store and use.

1 Batch completion report

Status of invited, onboarded, completed and outstanding suppliers, with a clear view of what changed in the batch.

2 Supplier emissions summary

Standardised supplier Scope 1 and Scope 2 emissions data in a consistent format for internal review and reporting workflows.

3 Certificate schedule

Supplier certificate numbers, issue dates, expiry dates and registry verification status in one schedule.

4 Exceptions list

Unresolved suppliers, missing items, data issues and recommended actions, so your team can focus only on the exceptions.

5 Data quality notes

Plain-English notes on assumptions, evidence status, supplier gaps and the quality of the supporting records.

6 Recommended next steps

Practical actions for supplier follow-up, internal review, the next batch and renewal planning.

Designed for practical use. The delivery pack is built to give your team a standardised supplier data set, not another set of inconsistent spreadsheets, ad hoc emails or supplier-by-supplier explanations.

Batch summary

Less Carbon completed Batch 1 of the supplier emissions program for Example Retail Group Limited. Of the 250 suppliers invited, 214 completed onboarding and 186 received a registered Supplier Emissions Certificate. The remaining suppliers are shown in the exceptions list with current status and recommended next steps.

SAMPLE ONLY - PUBLIC WEBSITE VERSION

Less Carbon · Sample Reporting Entity Delivery Pack

Page 3 of 9

Standardised supplier data.

The RE receives a structured supplier emissions data extract for completed suppliers. The public sample below is deliberately shortened.

Supplier	ABN	Category	Certificate No.	Scope 1	Scope 2	Total	Quality	Status
ABC Logistics Pty Ltd	11 111 111 111	Transport	LC-2026-000184	184.2	36.8	221.0	B	Certified
Metro Packaging Co Pty Ltd	22 222 222 222	Packaging	LC-2026-000185	42.5	118.4	160.9	A	Certified
Bright Facilities Pty Ltd	33 333 333 333	Facilities	LC-2026-000186	76.3	44.1	120.4	B	Certified
Northside Labour Hire Pty Ltd	44 444 444 444	Labour hire	LC-2026-000187	8.1	12.7	20.8	B	Certified
Blue River Maintenance Pty Ltd	55 555 555 555	Maintenance	Pending	-	-	-	C	Awaiting docs

Units: tCO2-e

Coverage: supplier Scope 1 and Scope 2 emissions

Use: internal review, supplier data capture and reporting workflow support

Important: this is not a full RE Scope 3 calculation. It is a standardised supplier data pack designed to support the RE's internal reporting process.

Registered certificate references.

Each completed supplier receives a Supplier Emissions Certificate with a unique certificate number and registry verification reference.

Supplier	Certificate No.	Issue date	Expiry date	Registry status
ABC Logistics Pty Ltd	LC-2026-000184	15 Aug 2026	14 Aug 2027	Valid
Metro Packaging Co Pty Ltd	LC-2026-000185	15 Aug 2026	14 Aug 2027	Valid
Bright Facilities Pty Ltd	LC-2026-000186	15 Aug 2026	14 Aug 2027	Valid
Northside Labour Hire Pty Ltd	LC-2026-000187	15 Aug 2026	14 Aug 2027	Valid

Registry verification

Certificates can be checked through the Less Carbon registry using the certificate number or QR verification reference.

Sample QR only. For public sample use, the code may point to a sample registry page or a non-live demonstration record.

Public verification view

The public registry result should confirm only limited certificate information: valid / invalid status, supplier name, issue date, expiry date and certificate reference. Further disclosure should remain controlled by the supplier or the agreed RE program terms.

What still needs attention.

Not every supplier completes cleanly. The delivery pack shows unresolved suppliers, the issue and the recommended next step.

Supplier	Current status	Issue	Recommended next step
Blue River Maintenance Pty Ltd	Awaiting documents	Fuel records not uploaded	Send final document reminder
Greenwest Cleaning Pty Ltd	Intake incomplete	Started intake but did not submit	Procurement contact to follow up
Harbour Electrical Pty Ltd	Data inconsistency	Electricity usage does not match uploaded invoices	Supplier to confirm reporting period
Site Safe Labour Pty Ltd	Non-responsive	No response after three reminders	RE to decide whether to escalate
Citywide Repairs Pty Ltd	RE decision required	Supplier disputed participation requirement	RE procurement owner to confirm position

28
Awaiting documents

14
Intake incomplete

22
Non-responsive

6
RE decision required

Why this matters: your team receives a clear view of what is complete, what is missing and what needs a decision - not a raw data dump.

Evidence status in plain English.

A
Complete records supplied and assessment completed without material gaps.

B
Minor gaps or assumptions, but sufficient records supplied for assessment.

C
Material gaps, estimates or unresolved data issues noted.

D
Insufficient information to issue a standard certificate.

Rating	Supplier count	% of assessed suppliers	Comment
A	64	34%	Complete supplier records provided.
B	96	51%	Minor gaps or assumptions noted.
C	26	14%	Material gaps or estimates used.
D	4	2%	Insufficient data for standard certificate.

Common issues
Missing fuel records, electricity records outside the reporting period, multiple sites not clearly separated, and supplier confusion about Scope 3 requests.

What the rating does
The rating gives the RE a simple data quality view. It does not replace internal review, audit review or legal reporting judgement.

Built for scale, controlled for quality.

Less Carbon uses AI-assisted processing to collect, organise and calculate supplier emissions information using the Less Carbon methodology.

✓ **AI-assisted processing**

Supplier records are organised, checked and prepared using automated workflows designed for consistent handling across large supplier batches.

✓ **Exception handling**

Missing information, inconsistent records and supplier issues are flagged rather than hidden.

✓ **Less Carbon QA**

Outputs are subject to Less Carbon review and quality control before a delivery pack is issued.

✓ **Practical handover**

Your team receives data, certificates, exceptions and next steps in usable formats.

Important note: this pack is designed to support supplier data collection, internal review and reporting workflows. It is not an audit, assurance opinion, legal compliance certification or full Scope 3 report.

Full pack contents

Batch Delivery Report	PDF	Supplier Emissions Summary	Excel / CSV
Certificate Schedule	Excel / CSV	Supplier Certificates	PDF / ZIP
Exceptions List	Excel / CSV	Data Quality Notes	PDF / Excel

From batch handover to action.

Area	Recommended action
Certified suppliers	Load certificate schedule and emissions data into the internal reporting or procurement system.
Outstanding suppliers	Issue procurement follow-up to suppliers listed in the exceptions schedule.
Non-responsive suppliers	Confirm whether suppliers should be escalated, deferred or removed from the current batch.
Data gaps	Request missing documents or supplier confirmation where noted in the data quality schedule.
Next batch	Confirm final supplier list, contacts and priority categories for Batch 2.
Renewals	Schedule reassessment before certificate expiry.

Real supplier data. Standardised. Done for you.

Hand us the supplier list. We run the intake, assessment, follow-up and certification process. You receive one standardised delivery pack at the end of each batch.

Scope a supplier program
